- Font, colors from Mockup A
- Headers and alignment from Mockup A
- Menu buttons at top from Mockup B; potentially make the intro text to the left of it bigger
- Make images larger if possible
- Making the buttons pop more while retaining how they match the remaining theme, and hover state for buttons
- Mobile versions largely the same, just compressed
- More font contrast while retaining warm colors
- Slightly prefer first image from Mockup A b/c it matches color palette but pick whichever one fits best with menu buttons
